After looking seriously at 5-6 different log home companies, it was the quality and personality of the dealers that finally made the choice for us. Most of the products are similar in nature, but the CNW dealer's attention to detail, suggestions, tips and consistent follow through were what made it a winning proposition and a picture perfect result.

*Art and Patti Myers*

We always dreamed of building a log home. We spent many years researching and discussing many log home designs and companies. The CNW dealers have always been willing and able to help with the many questions and concerns. We have made many decisions in the past year regarding our new house, but by far the best decision we made was choosing a log home company with good people to work with.

*Mike and Lynette Clutter*

With the completion of our home we wanted to let you know how delighted we are with the service of your dealers. Living in one state and building a home in another seemed to be an impossible task, but with their guidance and support we were able to make our dream a reality.

*Scott and Maria Gray*

We were on a trip looking for property and while sitting in our rental car admiring a log home in Idaho and discussing its appearance and workmanship, the door of the home opened with the owner inviting us in. We knew we had found the log home we had been searching for, but we did not know that the homeowners were dealers for CNW Log Homes. We bought our home from them, and they were with us in every phase of building, from the design of the plans to the unloading of the truck to the final log being set to the home's completion and our moving in.

*Gary and Susan Showse*
